## Biography:

The men behind the mask: Electronic producer and DJ duo from the capital of Austria, Vienna focusing on the heavier side of Drum & Bass. While both were working on their single-projects from 2016 on it quickly became clear, both perfectly match each other!

In early 2017, they combined their forces and created something even bigger – Spaced Out was born. Combining Jump Up with Neurofunk, their sets are filthy and fresh at the same time.

Keep an eye on them!
